Office Action Summary

Applicants' election of Group IV (claims 5-17 and 20) without traverse is acknowledged. (Group V will be rejoined after determination of allowable subject matter). Claims 1-4 and 18-19 are withdrawn from consideration.

*

Claim 5 is rejected under 35 U.S.C. §112 second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 is dependent on non-elected claim; the substituent variables should be re-defined in claim 5.

There is a minor typographical error on page 103, line 11. The "5" should be followed by a period, rather than a comma.

*

The following is a quotation of the appropriate paragraphs of 35 U.S.C §102 that form the basis for the rejections under this section made in this action.

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5-12 are rejected under 35 U.S.C. §102(b) as being anticipated by Voigt

(*Pharmazie* 41, 233, 1986).

Voigt teaches compound 4 (page 233) which corresponds to one of applicants' compounds in which the substituent variables correspond as follows:

R1 = *beta*-naphthyl,
B = C
Z = C
X = COOH
R4 = hydrogen
R5 = *para*-cyano-benzyl

Thus, the claims are anticipated.

The following is a quotation of 35 USC §103 which forms the basis for all obviousness rejections set forth in the Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) and (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103, the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made, absent any evidence to the contrary. Applicant is advised of the obligation under 37 C.F.R. 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103.

Claim 20 is rejected under 35 U.S.C. §103 as being unpatentable over Voigt (*Pharmazie* 41, 233, 1986).

The teachings of the reference are indicated above. The reference does not suggest

preparing a "pharmaceutical composition". However, if the compound were placed in water, the resulting mixture would meet the criteria; if the compound were placed in mineral oil, DMSO, or ethanol (for obtaining spectra), the resulting composition could also be construed as meeting the limitation.

The claim is thus rendered obvious.

Document WO 96/31206 has been stricken from the IDS. Although applicants provided no fewer than eleven copies of the search report, the document itself was not provided.

No claim is allowed.
